How to use the hardware- General Instructions

- You can watch the following video: <https://www.youtube.com/watch?v=ZBSiZ5Pcjjg> .
- Using your Quest 2 headset: <https://support.oculus.com/articles/headsets-and-accessories/using-your-headset/index-using-your-headset/>

How to use the oculus controller

- 1) By pressing & holding **the grip button** you can grab objects.
If you want to change hands, (for example instead of your right hand to use your left hand), firstly you leave a little space between your virtual left hand and the object which you are currently grabbing and using the virtual right hand, you press & hold the left Grip Button. After that you can stop pressing the right Grip Button.
- 2) By pressing the **trigger button** you click or select UIs (User Interface: start/continue buttons) when needed.
- 3) Using the **left Thumb Stick** you can move around towards all directions.
- 4) With the **right Thumb Stick** you rotate the camera left or right.
- 5) To see up or down, you just rotate your head up or down.
